

Smoking Area Bins & Benches

There are no bins or benches in the smoking area outside the RM building. Cigarette butts are litter and are often strewn around the floor near there. A bin would clean up the area massively. Also as there is no bench, students (especially those with disabilities) may find the space easier or more desirable to use, encouraging it to be used in place of walking around outdoor campus areas. This also prevents cigarette butts being left around and discourages smoking in non-permitted areas. Other students in the smoking area, and even those that don't use it, have agreed with the idea and the benefits it could have for the cleanliness of the air and environment around Solent University.
